The results of the Sharp Performance Midwest High School Testing Combine were recorded using the following testing equipment in the described conditions:

**40 Yard Dash** - The 40 times were recorded outdoors on artificial turf. Athletes were given two (2) attempts; one (1) with the wind, and one (1) into the wind. Testing equipment included Fusion Sport Timing and multiple hand held stop watches. Each attempt was triggered by hand, on athlete's first movement. The Fusion system operated with an electronic beam finish. The official time provided here is a composite mark of the multiple recordings taken during each 40 yard dash attempt.

**Vertical Jump** - The vertical jump was tested using a Probotics Vertical Jump Mat. Each athlete was given two (2) attempts with the best mark recorded.

**Bench Press Rep Max** - Using conventional weight benches, each athlete was given a chance to bench press their choice of 135, 155, or 185 pounds to failure.

**Standing Broad Jump** - The standing broad jump was tested on artificial turf. Athletes were given two (2) attempts, with their best mark being recorded.

**Pro Agility Drill** - The pro agility drill was recorded outdoors on artificial turf. Each attempt was recorded using multiple hand held stop watches. Athletes were given two (2) attempts. The official time is a composite of the multiple recordings taken from each attempt.
